\*General IEMCH training hours must pertain to relationship-based principles and practices of infant and early childhood mental health.

\*\*Psychotherapy trainings include: (1) Theory and practice of parent-infant/child psychotherapy, including attachment and developmental psychology; (2) infant observation related to attachment; (3) caregivers' conscious and unconscious views and their impact on the infant-caregiver relationship; (4) developmental and relational trauma; therapeutic interventions to support bonding; (5) the influence of caregiver mental health on the relationship; and (6) cultural or contextual factors affecting caregiving and attachment.

\*\*\* RSC must be provided by an Endorsed or Vetted Provider for the experience to qualify.
